

HELPING HANDS FROM ACROSS THE WORLD

The Needle Bugs, together with their Leader, Gerry, decided to make pillows to help with the tsunami relief efforts. The Needle Bugs members are twin sisters, Andrea and Miranda. They started on their designs.

Miranda says: I decided to make a pillow with a picture of the earth on it with my hands traced around it and some stick people holding hands. This shows that people anywhere in the world can help in time of disaster.

Andrea says: I decided to make a pillow too and to make a picture with the same idea as Miranda's but I put hands all around mine and did not put the stick people on it. I made the hands on all four corners and the world in the middle. I traced my hands to make the hands around the world.
